Conference Programme

University of York
4-6th September 2017

Delegates are advised that some details and timings in this programme are subject to change.
Monday 4th September

09.30 - 11.00 Plenary 1A

Welcome and Opening

The Humanitarian Initiative and the Nuclear Weapons Ban Treaty

Chair  Professor Tilman Ruff (Nossal Institute for Global Health, University of Melbourne)

Speakers  Dr Ira Helfand (IPPNW)
          Rebecca Johnson (Acronym Institute)
          Beatrice Fihn (ICAN)
          Dr Nick Ritchie (University of York)

A new treaty to prohibit nuclear weapons was adopted at the UN on July 7. The Treaty explicitly stigmatises and prohibits nuclear weapons, and establishes a legal, moral and political foundation for their elimination. This panel will discuss how health professionals can use their social standing and expertise about the medical, environmental, and humanitarian consequences of nuclear weapons to press for nuclear-armed and nuclear-dependent states to support the ban treaty. The panel will discuss whether there is one common strategy for all abolition campaigners, or whether different strategies are needed, based on national/regional political environments.

11.00 - 11.45 Tea Break

11.45 - 13.00 Plenary 1B

From Prohibition to Elimination: Strategic Next Steps

Chairs  John Loretz (IPPNW)
        Xanthe Hall (IPPNW Germany)

Speakers  Kate Hudson (Campaign for Nuclear Disarmament)
          Dr Robert Dodge (Physicians for Social Responsibility)
          Dr Anastasia Medvedeva (RPPNW)
          Kjølv Egeland (University of Oxford)
          Arun Mitra (Indian Doctors for Peace and Development)
          Akira Kawasaki (Peace Boat)
          Sue Wareham (IPPNW)
          Sally Ndung’u (IPPNW Kenya)
          Carlos Umana (IPPNW Latin America)
Countries and civil society organisations that support the ban treaty face a number of challenges in making the treaty universal so that it covers nuclear-armed and nuclear-dependent states. There are many "positive obligations" built into the treaty that countries can implement immediately to accelerate progress toward a nuclear-weapons-free world. This panel of regionally diverse speakers will present some initial ideas about how the ban treaty can be used to advance the abolition of nuclear weapons in their specific social and political environments. A series of workshops on Wednesday will take up these strategy proposals in greater depth.

**13.00 - 14.00**  
Lunch

**Poster presentations in exhibition centre**

**14.00 - 16.00**  
**Plenary 1C**

**The Structural Drivers of War, Conflict and Violence**

Chair  
**Professor Kate Pickett** (The University of York)

Speakers  
**Max Lawson** (OXFAM)  
**Professor Sir Andrew Haines** (London School of Hygiene and Tropical Medicine)  
**Dr Alexander Butchart** (World Health Organisation)

This panel will explore the wider determinants of violence and conflict worldwide. Max Lawson will discuss the global political economy and inequality as a driver of war and violence. Andy Haines will speak about climate change as a structural driver of conflict. Alexander Butchart will focus on interpersonal violence (i.e. homicide, youth violence, child maltreatment etc.) and their structural drivers.

**16.00 - 16.30**  
Tea Break

**16.30 - 18.30**  
**Evening Programme**

**IPPNW Regional Meetings**

Free time to view posters, stalls, and network with speakers and other delegates for non-IPPNW delegates.

**19.00 - 22.00**  
**Congress Dinner at National Railway Museum**

Delegates are invited to join Medact and the IPPNW at our opening night congress dinner, to network with our delegates and celebrate.

To book your place, please contact [conference@healththroughpeace.org](mailto:conference@healththroughpeace.org).
Alternative Programme - for those not attending the Congress Dinner

18.00 - 19.00  Drinks Reception

19.00 - 21.00  Film Screening: National Bird

_National Bird_ follows the dramatic journey of three whistleblowers who are determined to break the silence around one of the most controversial current affairs issues of our time: the secret US drone war. At the center of the film are three US military veterans. Plagued by guilt over participating in the killing of faceless people in foreign countries, they decide to speak out publicly, despite the possible consequences. Their stories take dramatic turns, leading one of the protagonists to Afghanistan where she learns about a horrendous incident. But her journey also gives hope for peace and redemption. _National Bird_ gives rare insight into the US drone program through the eyes of veterans and survivors, connecting their stories as never seen before in a documentary. Its images haunt the audience and bring a faraway issue close to home.
Residential Options

We have on-site university accommodation available for all delegates.

Join our community of international attendees, health workers, peace campaigners, and speakers, by staying with us overnight throughout the conference.

Our conference accommodation is reasonably priced, will save you travel expenses for each day, and includes meal options.

If you have already registered, but would like to book your accommodation with us, please contact conference@healththroughpeace.org to arrange your stay.

Rates (Per Night)  | General  | Student  
---|---|---
Ensuite Bathroom (Including Meals)  | £80.00  | £65.00  
Shared Bathroom (Including Meals)  | £60.00  | £50.00  
Shared Bathroom (Not Including Meals)  | £35.00  | £30.00  

Full conference programme details and session registration will become available nearer to the event, and all attendees will receive a full delegate pack with the final programme at York.
Tuesday 5th September

The second day of the conference brings together academic researchers, leaders in civil society, and those in the fields of peace and health. Our two opening plenaries include an exclusive appearance from the Archbishop of York, and a panel led by Medecins Sans Frontieres.

09.00 - 10.30  Plenary 2A

Preventing war and violence: the democratic and civic challenges of peacebuilding

Chair  Feryal Awan (Medact)
Speakers  Professor Paul Rogers (Oxford Research Group)
Dr John Sentamu (Archbishop of York)
Karin Olofsson (Parliamentary Forum on Small Arms and Light Weapons)
Professor Nina Caspersen (University of York)

This session will present the perspectives on the challenges facing civic organisations and the general public in building peace. Paul Rogers will describe the historical and global trends that shape violence and armed conflict. The Archbishop of York will discuss the role of the faith community in building peace and standing against forms of religious fundamentalism that breed conflict, fear and intolerance. Karin Olofsson will discuss the role of parliamentarians in controlling the arms trade and protecting human rights. Nina Caspersen will cover the dynamics of intra-state conflicts and strategies for conflict resolution.

11.00 - 13.00  Plenary 2B

Counter-terrorism and the erosion of ethics in International Humanitarian Law

Chair  Andre Heller-Perache (Medecins Sans Frontieres)
Speakers  Dr Ghassan Abu-Sittah (American University of Beirut)
Francoise Bouchet-Saulnier (Medecins Sans Frontieres)
Julian Sheather (British Medical Association)
Victoria Brittain (Independent Journalist)

Fifteen years since a “war on terror” was declared by the United States, we can clearly see evidence of an erosion of international humanitarian law norms in the practice of targeted bombings of hospitals, attacks on humanitarian workers, detention without trial and torture, and extra-judicial killings. This session will examine the flouting of IHL and ethical norms by western democracies, and how this has encouraged other regimes to new levels of repression and corruption. The international health
community has an important contribution to make in defending and reasserting the critical role of IHL and ethical norms in the conduct of war, conflict and violence, and strengthening the mandate and agency of the UN in upholding international law.

13.00 - 14.00 Lunch

13.15 - 14.00 Open Lunchtime Workshop

Getting your book published on health, peace and development

Speakers Laurence Radford and Kim Walker (Zed Books)

Zed Books will describe the academic publishing process for PhD students, mid-career and experienced academics. The workshop will advise on how best to structure your book, present your manuscript proposal, choose the right publisher and market your book to the widest possible audience. Focussing on humanities and the social sciences, attendees will gain knowledge of a book’s life cycle from conception to the shelves, and how academics can use this process to maximise the reach of their research.

14.00-15.30 Academic Sessions 2C

2Ci Attacks on Health Care in Conflict (14.00-15.30)

Chair Daniel Flecknoe (NHS and Medact Trustee)

Violence against health care in Syria
Agneta Kallöstrm (University of Eastern Finland), M Häkkinen, O Al-Abdulla, J Kauhanen

Understand, prevent and mitigate attacks on healthcare in conflict
Michelle Mulhausen (London School of Economics), Emma Tuck, Heather Zimmerman

Health care under fire
Tracy Kuo Lin (London School of Economics)

2Cii Mental Health (14.00-15.30)

Chair Jeremy Wight (Public Health Doctor and Medact Trustee)

Effect of exposure to conflict on the relationship between IPV, poor mental health and substance abuse within families in the post-conflict period
Rachel Colin-Jones (University of Oxford)

Suicide in transgender populations
Adrienne Milner (Queen Mary University of London)

Globalisation and Neoliberalism: Structural Determinants of Global Mental Health
Matthew Roberts (Independent)

The chronic pain experience and needs of asylum seekers and refugees in Glasgow
Beth Dorrans (Department of General Practice and Primary Care, University of Glasgow)

2Ciii Nuclear Effects on Public Health (14.00-15.30)

Chair Marion Birch (Medicine Conflict and Survival)

Health risk assessment six years after Fukushima
Hirosi Ohmae (Physicians Against Nuclear Weapons), Kazuto Hara, Takeo Nakagawa, Tetzuo Lida

Climatic Impacts and Humanitarian Problems from the use of the UK’s Nuclear Weapons
Phil Webber (Scientists for Global Responsibility)

Pathophysiology and epidemiology of acute lymphoblastic leukaemia of childhood
Frank Boulton (Medact)

Health effects from living close to nuclear weapons and nuclear energy facilities
Ian Fairlie (Independent)

The Atomic Olympics: Melbourne 1956
2Civ British Military Recruitment and Marketing: Targeting Disadvantaged Young People (14.00-15.30)

Chair: Yannis Gourtsoyannis (Junior Doctor and Medact Trustee)

Speakers:
- Wayne Sharrocks (Peace Pledge Union and Veterans for Peace)
- David Gee (Forces Watch)
- Rhianna Louise (Forces Watch)
- Feryal Awan (Medact)

Deciding to enlist into the military is an important, life-altering decision. Not only can it have social and health implications, it also requires continuous moral and cognitive interrogation. In the UK, children aged 16 and 17 years can be recruited into the armed forces. This panel will present:

- The 2016 report by Medact, ‘The recruitment of children by the UK armed forces: a critique from health professionals’
- The 2017 Veterans for Peace report on the mental health impacts of military training, ‘First Ambush’
- The 2017 Forces Watch paper ‘Does the military give young people a ‘leg up?’ The armed forces and social mobility’
- Ongoing research into UK military recruitment marketing campaigns

2Cv Gender, Health and Education (14.00-15.30)

Chair: Jonathan Cunliffe (Junior Doctor and Medact Trustee)

Adolescent motherhood as a proxy for gender power differentials
Ariana Fernandez (Arias Foundation for Peace and Human Development, Costa Rica) - Live Stream

Building school-level capacities to respond to sexual violence against girls in South African school
Gillian Makota and Lara Leoschut (Centre for Justice and Crime Prevention, South Africa)

Medical education in the Kurdistan region of northern Iraq
Ian Watt (Hull York Medical School), Firya Peryadi, John Bushby, Una Macleod, Alison Pettigrew, Trevor Sheldon

2Cvi Data to Action: Using Hospital-Based Research on Violent Injury to Inform Policy (14.00-15.30)

Chair: David Pencheon (NHS Sustainable Development Unit)

Weapons Disposal Programme on Injuries: Papua New Guinea
Small arms and light weapons injuries in Sokoto State, Nigeria
Chukwuemeka Okolo (IPPNW Nigeria)

Preventing International Injury in Liberia
Care for victims of violence in Lusaka, Zambia
Study of firearm cases in Punjab, India
Maria Valenti (IPPNW)

2Cvii Ethics of Warfare and Intervention (14.00-15.30)
Chair Nina Caspersen (University of York)

Just War Theory and the Duty to Assist Civilian Casualties
Marcus Schulkze (University of York)

Ethics and Contemporary War and Warfighter Enhancement
Dominik Stosik (Wrocław Medical University)

Are allegations of WHO bias during the Syrian Civil War justified?
Jonathan Kennedy (Queen Mary University of London)

Re-thinking the health-security nexus
Joao Terrenas (University of York)

2Cviii Structural Violence and Environmental Degradation (14.00-15.30)
Chair Andrew Harmer (Queen Mary University London)

Turning a blind eye: Why climate change-associated conflict might not be recognised, and why it matters for health
Devin Bowles (Australian National University) - Live Stream

Inequality as a driver of Climate Change, Climate Change as a driver of armed conflict
Roberto De Vogli (University of Padua, Italy)

16.00-17.30 Academic Sessions 2D

2Di Click-tivism and Health Campaigning Workshop (16.00-17.30)
Chair Sarah al-Hulail (Medact Militarisation Group)

Engaging the health community in the UK on the issue of attacks on hospitals
Andre Heller-Perache (Medecins Sans Frontieres)
Experiences and Perspectives from Campaigning on the Health Impacts of the Arms Trade
Ben Clavey (Medact Arms and Militarisation Group)

Health professionals are often motivated by a desire to improve the lives of people worldwide. They often see their daily work as a reflection of these values. However, campaigns run by or targeted at health professionals often struggle to mobilise this group effectively. This workshop will look at the potential to engage with the health community, and how campaigners can work more effectively with this group.

2Dii Health and the Migrant / Refugee Crisis (16.00-17.30)

Chair: Neil Arya (Canadian Physicians for Research and Education in Peace)

Going on tahrīb: why young Somalis embark on the dangerous journey to Europe
Nimo-Ilhan Ali (Rift Valley Institute)

The Refugee Explosion: Exploring the response of European states to the Refugee Crisis
Jennifer Dathan (Action On Armed Violence)

A Glass Half Empty: The Consequences of Unaddressed Crimes Against Boy Refugees
Mariela Goett and Amy West (American Institutes for Research)

Home childbirth an alternative for in-hospital delivery for Syrian Refugees in Lebanon
Mathilda Jabbour and Richard Giordano (University of Southampton)

2Diii Mitigating Nuclear Violence (16.00-17.30)

Chair: Sophie Neuberg

Nuclear famine
Helfand (IPPNW)

Nuclear conflict flash point in South Asia
Khuram Balkrishna (Indian Institute for Peace, Disarmament and Environmental Protection)

War - Its Consequences on the Atmosphere and Public Health
Asis Debbarma, Yudhisthir Das, Jhunu Debbarma (IDPD, Agartala Government Medical College, Tripura, India)

The Ban Treaty and Inventing Nuclear Disarmament
Nick Ritchie (The University of York)

2Div Militarism and Culture (16.00-17.30)

Chair: TBC

Hubris and armed conflict
**Eugene Sadler-Smith** (University of Surrey)

**The militarisation of science and technology in the UK**
**Stuart Parkinson** (Scientists for Global Responsibility)

**Warrior Nation: War, Militarisation and British Democracy**
**Paul Dixon** (Kingston University)

**Militarism, the police and the ‘war on crime’ in South Africa**
**Guy Lamb** (University of Cape Town)

**2Dv Panel Discussion - Prisoners’ Health in Israel and Palestine (16.00-17.30)**

Chair: **Feryal Awan** (Medact)

Speakers: **Dana Moss** (Physicians for Human Rights)
**Roisin Jacklin** (Medical Aid for Palestinians)
**Tareq Shrouou** (Lawyers for Palestinian Human Rights)

This panel will discuss the various political and social conditions endured by Palestinians – including breaches of international humanitarian and human rights law – and how this undermines their psychological well-being and cause unnecessary trauma and suffering. Palestinians have been exposed to regular and often deadly violence, engendering direct risks of psychological trauma and negative mental health outcomes among the population.

This discussion will also cover various topics including the psychological impacts and legal aspects of solitary confinement; administrative detention and hunger-strike protests, forced-feeding law passed in Israel, and will include a screening of the short documentary *Breaking the generations: Palestinian prisoners and medical rights* (25 mins).

**2Dvi Nuclear Weapons Modernisation modernisation and deployment (16.00-17.30)**

Chair: **Nick Ritchie** (University of York)

Speakers: **Paul Ingram** (British American Security Information Council)
**Peter Burt** (Drone Wars UK)

This participatory session will examine the implications of emerging technologies on the stability of nuclear deterrence in the context of the modernisation of the UK’s Trident nuclear weapon system as a case study. It will consider the the likely evolution of nuclear deterrence, the changing nature of warfare and international politics, and will present an alternative approach to international strategic stability and relate these to current efforts to control and ultimately ban nuclear weapons.

**2Dvii Drone Warfare: Issues and Concerns (16.00-17.30)**

Chair: **Dr Emma Butcher** (University of Leicester)
This panel assesses contemporary issues and possible trends in drone warfare. The legality of British and American drone strikes will be discussed, changes in drone policy that have taken place under President Trump will be outlined, the impact of strikes on civilians will be analyzed, and emerging trends for future use will be outlined. The panel aims to raise pertinent issues and generate discussion and debate on this important topic.

2Dviii Religion and discrimination (16.00-17.30)

Chair: Adrienne Milner (Queen Mary University London)

Muslim People’s Perceptions of Discrimination in Healthcare Encounters
Matthew Roberts (Independent)

Muslims residing in the UK and their perceptions of British Combat Troops
Ahmed Hankir (Leeds York Partnership Foundation Trust)

Access to healthcare for Unaccompanied Refugee Minors in the Netherlands
Basema Salman-Spijkerman (Peace Fellow, Health, Gender & Mediation expert)

18.00 - 19.00 Evening Programme

18.00 - 19.00 Scientists for Global Responsibility - 25th Anniversary Drinks Reception (open to all)

19.00 - 21.00 Evening Film Screening Lecture Theatre PX001

Shadow World (2016) - 94 mins
Directed by Johan Grominprez

*Shadow World* reveals the shocking realities of the global arms trade – the only business that counts its profits in billions and its losses in human lives. The film reveals how the international trade in weapons – with the complicity of governments and intelligence agencies, investigative and prosecutorial bodies, weapons manufacturers, dealers and agents – fosters corruption, determines economic and foreign policies, undermines democracy and creates widespread suffering.

Followed by Q + A with Andrew Feinstein
Wednesday 6th September

09.30 - 11.00    Plenary 3A

Building the Progressive Health Movement

Chair  Alice Blewitt (UK Students for Global Health)

Speakers  Ben Griffin (Veterans for Peace)
           Professor John Middleton (Faculty of Public Health)
           Wim De Ceukelaire (Third World Health Aid and People's Health Movement Europe)
           Dr Daniel Bassey (IPPNW)

11.00 - 11.30    Tea Break

Overview of Workshops

Delegates have the choice to attend any of the following sessions.

Places can be reserved through our booking platform, which will open for conference delegates soon. Delegates will be notified via email with further details about this.

We consider nuclear weapons to be a failure of governments and a failure of the international community. There was a global move away from nuclear weapons at the end of the Cold War, but this momentum has been lost and now we must work toward eliminating them. Peace, solidarity and human rights-based medical assistance to refugees is key to overcoming militarization and securitization of refugees and borders of Europe. It is necessary that we change the “refugee crisis” perception to one of a humanitarian crisis requiring humanitarian assistance.
**4B Our Nuclear Legacy: The Toxic Inheritance for Future Generations 11.30-13.00**

Chair: Alex Rosen (IPPNW, Germany)

Speakers: 
- Richard Denton (PGS, Canada)
- Gordon Edwards (PGS, Canada)
- Claudio Knüsi (PSR, Switzerland)
- Martin Vosseler (PSR, Switzerland)
- Martin Walter (PSR, Switzerland)

Nuclear waste is an important aspect of the nuclear chain, yet is frequently forgotten by the general public and politicians. Health professionals need to be aware of the economic, technical, medical, ecological, ethical and legal aspects of this complex issue. The workshop will pose several questions: What is nuclear waste? How big is the problem? What are the options for taking care of nuclear waste? How much of a proliferation risk is nuclear waste? What are the ethical implications of dealing with hazardous waste that will pose a threat to future generations? How do different countries deal with these problems? We will also use the workshop to develop ideas for a new brochure on nuclear waste.

**5B Gender, Violence and Conflict: Panel Discussion 11.30-13.00**

Speakers: Chris Dolan (Director, Refugee Law Programme)

This panel will present medical evidence, gathered from the Refugee Law Programme’s caseload of refugees from countries bordering Uganda, concerning the health consequences of male-directed sexual violence. Resulting conditions may require specific treatment capacities and facilities, including advanced surgery. Discussion will be around treatment needs and how these can be addressed in contexts such as Uganda where facilities are limited.

**6B Medical Peace Work: Teaching and Practicing Health Through Peace 11.30-13.00**

Chair: Eva-Maria Schwienhorst-Stich (IPPNW, Germany)

Speakers: 
- Klaus Melf (IPPNW, Norway)
- Katja Goebbels (IPPNW, Germany)
- Stephan Kolb (Medical Peace Work Network)
- Katharina Thilke (IPPNW, Germany)
- Angelika Wilmen (IPPNW, Germany)
- Hellen Barsosio (IPPNW, Kenya)

Medical Peace Work (MPW) is a field of study, research and practise which aims at enabling and empowering health professional to act as agents for peace. The workshop will provide insights into the concepts of MPW, make participants familiar with the teaching material, and show them how they can get involved in teaching and practise. We will cover relevant topics such as how to recognize signs of torture in patients, how to identify individuals at risk of domestic violence, ethical dilemmas faced by health workers, the health consequences of global warming, and the health consequences of different types of weapons.

**7B Training for NHS Health Professionals on the Rights and Entitlements to Health care of Migrants 11.30-13.00**

Facilitator: Anna Miller (Doctors of the World)

Refugees and undocumented migrants are repeatedly reported to have multiple health needs yet research has shown that such individuals often receive less effective healthcare and face barriers when
trying to access NHS care. This training module, aimed at healthcare professionals working in the NHS, is also relevant for those with an interest in health policy and human rights. The training covers entitlement to NHS care, barriers to accessing healthcare and the implications of restricting access to healthcare.

8B The Public Health Impacts of Conflict 11.30-13.00

With speakers from the Global Violence Prevention Special Interest Group of the Faculty of Public Health

This interactive workshop will explore the public health impacts of armed conflict, including the direct (physical & psychological trauma) and indirect (displacement, infectious disease, malnutrition, etc), using both contemporary and historic case studies. We will examine these impacts from a public health perspective and discuss possible prevention strategies to reduce or mitigate their effects on the population.

9B Challenging Military Influence in Universities and Schools 11.30-13.00

Speakers

Emma Sangster (Forces Watch)
Stuart Parkinson (Scientists for Global Responsibility)

Arms corporations and the armed forces target schools, colleges and universities to foster a positive image from an early age, to recruit the next generation of engineers and soldiers, and to influence research and technological development. They produce educational materials for the classroom, host exciting tours, undertake recruitment activities, and fund cutting edge scientific research. Yet rarely will these activities touch on the causes and consequences of war, or encourage critical thinking about the ethics of warfare or the arms trade. This workshop will summarise the influence that military organisations have in UK universities and schools. It will then discuss different ways to challenge this influence, how you can get involved, and why change is vital for a more just society.

10B The Radio as a Tool for Peace Education in Africa 11.30-13.00

Speakers

Chukwuemeka Okolo (Society of Nigerian Doctors for the Welfare of Mankind)
Mansur Ramalan (Society of Nigerian Doctors for the Welfare of Mankind)
Kati Juva (Physicians for Social Responsibility Finland)
Antti Junkkari (Physicians for Social Responsibility Finland)
Maria Valenti (Aiming for Prevention)

Armed violence is a health crisis in Nigeria, as it is in many African countries. Radio broadcasts can encourage violence, as was the case during the 1994 Rwandan genocide. But radio can also be used for good. In Nigeria, where radio is largely controlled by state broadcasters, there is a need to develop community radio stations with worthwhile content, as well as to encourage state-controlled stations to include community-oriented programs. This workshop will explore the question "Is creating public awareness via the radio about the effects of armed violence on health a viable way of educating the public and furthering the goal of achieving peace through health?" During an interactive roundtable discussion, we will present a case study of a pending North/South project between IPPNW affiliates in Nigeria and Finland. The project expands on the pilot radio program, “Bringing Peace to the People,” conducted in 2009 by Nigerian medical students in Jos.
11B Peace House: Giving a Legacy to IPPNW Students 11.30-13.00
Chair: Kati Juva (IPPNW International Council)
Speakers: Ilkka Taipale (Physicians for Social Responsibility Finland)
           Michael Christ (IPPNW Executive Director)
           Christoph Kraemer (IPPNW, Germany)

Over more than three decades, IPPNW has created a powerful legacy in the struggle for a more peaceful, nuclear-weapons-free world. Our message unites physicians from around the world, and transcends national borders and political ideology. But we need to ensure a stable future for IPPNW. This workshop will discuss the concept of a permanent IPPNW Peace House as a strategy for strengthening IPPNW's future. Participants are invited to bring some small items typical of their country or their peace activities, which then will be sold in an auction to raise funds for the Peace House.

12B The Millennial World 11.30-13.00
Facilitators: Lindsay Christison (University of York)
              Kieran Nash (University of York)
              Brandon Minichiello (University of York)
              Hannah Sackville-Bryant (University of York)

Global millennials make up 27% of the global population and are gaining a reputation as having a new and unique perspective on the world. University of York students present their research into the mindset of the millennial generation, how they perceive global issues and the implications this may have socially and politically. A new perspective may be brought to how we anticipate the future of nuclear warfare, national identity, climate change and the rise of the right. An interactive presentation with optional live polling of the audience as well as Q&A reflections throughout.

13.00-14.00: Lunch

14.00 - 15.20: Workshops Session C

1C Ban Treaty Implementation: Nuclear-Armed States 14.00-15.20
Chair: Ira Helfand (IPPNW)
Speakers: Bob Dodge (Physicians for Social Responsibility USA)
          Anastasia Medvedeva (RPPNW)
          Frank Boulton (Medact)
          Arun Mitra (Indian Doctors for Peace and Disarmament)

For the past five years IPPNW and ICAN have focused on achieving a new treaty to prohibit nuclear weapons as a humanitarian-based foundation for their elimination. With the treaty in hand, what comes next? How can we bring the nuclear-armed States into compliance with the Ban Treaty’s explicit prohibitions? What strategies should we pursue to raise awareness? Might we focus on a single state at first? if so, which one? This workshop will build upon ideas presented in the Ban Treaty plenary, with introductory remarks from affiliate activists in the UK, the US, Russia, and South Asia. Following an open discussion, we will identify potential elements of a strategic plan for the next two years.

2C Campaigning Against Trident in Scotland 14.00-15.20
Speaker: Janet Fenton (Campaign for Nuclear Disarmament, Scotland)

The US, France and England have never had an election where a party advocating nuclear disarmament had a serious prospect of winning. This is not the case in Scotland where support for disarmament is widespread across society and encouraged by the Scottish National Party membership. If Scotland reject nuclear weapons, the UK would not have an alternative site. This workshop will discuss the specific issues related to politics and anti-Trident sentiment in Scotland.

3C Journalism, the media and representations of conflict and war 14.00-15.20

Chair Andrew Feinstein (Author, Shadow World)
Speaker Greg McLaughlin (Author, The War Correspondent)

Greg McLaughlin is a journalist and former Senior Lecturer in Media and Journalism at Ulster University. He is now Associate of the Centre for Media Research, Ulster University, and Affiliate Member of the International Press Institute, Vienna. With research specialisms in journalism and conflict, his publications include The War Correspondent (Pluto Press, 2016); The British Media and Bloody Sunday (Intellect, 2015); and The Propaganda of Peace: The role of media and culture in the Northern Ireland peace process (Intellect, 2010). In this workshop Greg will discuss the role of journalism in the reporting of war and international conflict.

4C Keep Uranium in the Ground 14.00-15.20

Chair Dörte Siedentopf (IPPNW, Germany)
Speakers Richard Denton (PGS, Canada) Gordon Edwards (PGS, Canada) Hellen Barsosio (IPPNW, Kenya) Sally Ndung’u (IPPNW, Kenya) Mathabo Hlahane (IPPNW, South Africa) Claudio Knüssli (PSR, Switzerland) Martin Vosseler (PSR, Switzerland) Martin Walter (PSR, Switzerland) Helmut Lohrer (IPPNW, Germany) Susanne Grabenhorst (IPPNW, Germany)

IPPNW affiliates in many countries oppose uranium mining, and educate people about its health effects and the connections between uranium mining, nuclear energy, nuclear weapons and nuclear waste. This workshop will present the current body of scientific knowledge about the health impact of uranium mining, showcase recent activities by IPPNW affiliates, especially in Africa, discuss possibilities for local and global activism, and promote the idea of an international campaign to ban uranium mining. The aim of the workshop is to share knowledge and experience amongst activists, identify possibilities for closer cooperation between affiliates, and further the development of the global campaign that was started at the uranium mining conference in Quebec in 2015. We will begin with short presentations about the situations in several countries, and then open the discussion to all participants.

5C Gender as a Determinant of Health in the Syrian Refugee Crisis 14.00-15.20

Speaker Safiya Dhanani (Gender-Based Violence Program Coordinator, the International Federation of Medical Students’ Association)

Research over the past two decades has demonstrated a link between armed conflict and gender-based
6C Body Count: A Medical Peace Work Approach to the 'War on Terror' 14.00-15.20

Chair

Helmut Lohrer (IPPNW Germany)

Speakers

Jens Wagner (IPPNW Germany)
Dr. Hans-C. von Sponeck
Dr. Matin Baraki
Christoph Kraemer (IPPNW Germany)
Tim Takaro (Physicians for Social Responsibility)
Robert Gould (Physicians for Social Responsibility)
Dale Dewar (Physicians for Global Survival)

The so-called "War on Terror" and subsequent military actions have had profound impacts on health in the Middle East. In 2015, data about the casualty figures amongst civilians and the military collected by IPPNW affiliates from the US, Canada, and Germany was published in Body Count. The report has been frequently cited and was the subject of discussion at the German parliament. The immense loss of about 1.3 million lives and the refugee crisis in Europe are indications of the humanitarian catastrophe created by the "War on Terror." The workshop will explore how doctors can use data to measure the humanitarian impact of armed conflict and how fact-driven campaigns can have an impact on politics.

7C Healthcare in the West Bank: Refugee Project for Medical Students 14.00-15.20

Facilitators

Alice Blewitt (Students for Global Health & University of Sheffield)
Lotta Plomp (University of Amsterdam)
Haytham Sughayer (Al-Auds University)
Anna Nakamura (Cardiff University)

The Refugee Camp Project (RECAP) is a 4 week summer programme that brings together medical students from around the world to experience healthcare under conflict in the West Bank of Palestine. It is a collaboration between IFMSA Palestine and IPPNW Germany. In the first week, students learn about the history and politics of the Israeli-Palestinian conflict. During the three remaining weeks, students participate in medical internships of their choice, at clinics or hospitals that serve the refugee camp populations. Throughout the project, participants have the chance to experience Palestinian culture and hospitality and learn from student perspectives on the conflict. This workshop is aimed at medical students who want to know more about RECAP, and anyone who is interested in the experiences of RECAP coordinators and former participants.

8C Interactive Humanitarian Simulation Experience (Part 1) 14.00-15.20

Facilitator

Daniel Flecknoe (Medecins Sans Frontieres)

Ever wondered what it would be like to provide humanitarian aid in a warzone? Could you keep vital services running while everything around you falls apart? This immersive and thought-provoking exercise will give you a rare insight into the practical challenges, ethical dilemmas and cultural barriers faced by humanitarian NGOs working in conflict zones. The exercise is set in Darfur in the mid-2000s and is based upon real events. Delegates are advised that this session is 3 hours long, filling two workshop slots. There are 30 places on this session, so we ask that delegates reserve their space in
International from Treaty. with specific project in the financing on nuclear weapons and report the importance of a give example. Ban Treaty. Speakers Nuclear Bomb divestment in companies. Don’t this lead to develop new policy responses to illicit drug production and use that reduce harm and promote health, peace and sustainable development for the most vulnerable.

This interactive workshop has been designed to get participants thinking about the ‘war on drugs’ and its alternatives, and how this impacts the lives of people living in situations of poverty, violence and insecurity and on their own day-to-day lives and work. Workshop participants will actively examine the impacts of the ‘war on drugs’, explore different views and dissect some of the common myths. The workshop will use interactive group discussions based around issues raised in Health Poverty Action’s ‘Rethink Drug Policy’ animation. The workshop will also include a discussion of how health professionals, students and civil society can join the movement to help challenge the ‘war on drugs’ and its negative impacts for health and peace.

11C Don’t Bank on the Bomb 14.00-15.20

Speakers Andreas Tolf (Swedish Physicians against Nuclear Weapons) Elizabeth Minor (Article 36)

Don’t Bank on the Bomb provides details of financial transactions with companies that are heavily involved in the manufacture, maintenance and modernization of US, British, French and Indian nuclear forces. The report provides the basis for coordinated campaigning to discourage institutions from investing in nuclear weapons companies. This workshop will explore how to use Don’t Bank On The Bomb in your national campaigning, and the ways in which divestment campaigns can enhance the impact of the Nuclear Ban Treaty. Speakers will give examples of how Swedish campaigners have used the report to influence Swedish investments in the nuclear weapons industry, and the importance of a specific prohibition on financing in the Ban Treaty. Findings and analysis from a project with the International Human Rights Clinic at Harvard Law School will also be described.

12C Is Fracking Safe? 14.00-15.20

Facilitators Leigh Coghill (Frack Free York)
Dr Tim Thornton (Frack Free York)

This workshop will explore the impacts of fracking on health, exploring the evidence already outlined by Medact and others, the limits to understand the impacts of fracking, and the failings to undergo baseline measuring of health of residents and environment close to KM8. Frack Free York will also discuss campaigning experiences: what works, what doesn't, and maintaining momentum. They will talk about their multi-faceted approach, heavy legal campaigns and direct action. The workshop will also discuss community-lead involvement, the success of the ‘Nana’ phenomenon, and how the health community (doctors and allied health professionals, as well as students and academics) can get involved with the anti-fracking movement.

15.30 - 16.45: Workshops Session D

1D Ban Treaty Implementation: Nuclear-Dependent States 15.30-16.45

Chair Beatrice Fihn (International Campaign to Abolish Nuclear Weapons)
Speakers Xanthe Hall (IPPNW Germany)
Sue Wareham (Medical Association for the Prevention of War)
Kjølv Egeland (University of Oxford)
Akira Kawasaki (Peace Boat)

An intermediate step between prohibiting and eliminating nuclear weapons may well be changing the policies of the nuclear-dependent states (i.e. those in extended nuclear deterrence relationships or who otherwise claim to rely on another state’s nuclear weapons for security). What specific educational and political strategies might work to bring members of NATO, Japan, Australia, and others into the Ban Treaty orbit? How can IPPNW’s medical message further contribute to these next steps? The workshop will build upon ideas presented in the Ban Treaty plenary, with introductory remarks from campaigners in Europe, Australia, and Japan. Following an open discussion, we will identify potential elements of a strategic plan for the next two years.

2D Can Innovative Solutions Make the NHS Work? 15.30-16.45

Speakers Natasha Horsfield (Health Poverty Action)
Matthew Bramall (Health Poverty Action)

The NHS needs innovative solutions to solve the funding crisis. These need to align with progressive values and social justice. Health Poverty Action is planning a new campaign to force the government to take action, without privatising more hospitals or selling off more land, and tackle the harms of drug prohibition in the process. We want to hear your thoughts on our ideas and help us plan a campaign. If this sounds like a secret – it is! Come and find out more about our idea to provide the NHS with an innovative new funding stream and stimulate drug policy reform at the same time.

3D National or Human Security: What really makes us safe and well? 15.30-16.45

Speakers Diana Francis (Ammerdown Group)
Celia McKeon (Ammerdown Group)
Richard Reeve (Sustainable Security at Oxford Research Group)

Are mainstream assumptions and policies on security making us safer, or are they part of the problem? Can we envisage better responses that build cooperation and solidarity to address current suffering and crises in the world? In this workshop, we will offer some analysis of traditional security responses, as well as proposing some radically different options. It will also be an opportunity for collective thinking that draws on the experience and insights of participants. What do we know about the conditions
required to sustain the security and wellbeing of people and the planet? How can we build support for a different approach?

4D A Real Energy Revolution: Phasing out Fossil and Nuclear Energy  15.30-16.45

Chair: Angelika Claussen (IPPNW, Germany)
Speakers: Claudio Knüsl (PSR, Switzerland)
          Martin Vosseler (PSR, Switzerland)
          Martin Walter (PSR, Switzerland)
          Sean Morris (Nuclear Free Local Authorities, UK)
          Reinhard Uhrig (Global 2000, Austria)
          Alex Rosen (IPPNW, Germany)

Climate change is one of the most dangerous threats to our planet and a speedy transition to carbon-free, sustainable energy production is one of the most important tasks for the coming years. In about two dozen countries, however, the nuclear industry is lobbying for nuclear energy to remain part of the energy mix in the future. The workshop will begin with an overview of the enormous task ahead of us in transitioning to carbon-free, sustainable energy production. It will scrutinise the promises of the nuclear industry to offer a meaningful contribution to CO2 reduction and climate change alleviation by looking at the example of the proposed French-Chinese nuclear reactor at Hinkley Point in the UK. We will summarize the key arguments for a phaseout of both fossil and nuclear energy, and discuss possibilities for cooperation between IPPNW affiliates and partner organizations, especially in Europe.

5D Feminism and Peace Movements: Making the Links  15.30-16.45

Facilitators: Hannah Wright (LSE Centre for Women, Peace and Security)
              Laila Alodaat (Women’s International League for Peace and Freedom)
              Ray Acheson (Women’s International League for Peace and Freedom)

This workshop will explore how and why feminists have made links between the movement for gender equality and the movement for peace. It will examine why women have chosen to organise as women for peace both in the UK and in countries currently experiencing violent conflict. Participants will have the opportunity to discuss how gender norms and relations can affect peace, including in relation to militarism and the use and possession of weapons.

The workshop leaders will draw on relevant examples from their work on issues of gender and conflict in the Middle East and in relation to international disarmament or arms control processes. Participants will also explore feminist ideas about how transformation in gender relations might contribute to building a more peaceful world, and what this means for feminism and for transformations in the culture of militarism and militarised masculinities.

6D Barriers to the Development of Palestinian Healthcare  14.00-15.20

Chair: Roisin Jacklin (Medical Aid for Palestinians)

Fifty years of Israeli occupation have devastated the development of the Palestinian health sector. Join Medical Aid for Palestinians (MAP) to discuss how prolonged occupation has limited Palestinian health workers’ access to training and professional development and how MAP is challenging these barriers through programmes in the occupied Palestinian territory and advocacy in the UK. The workshop will also involve participants in contributing ideas to an open letter and petition directed at the UK government and aimed at ending the occupation and the blockade of Gaza.

7D Training for NHS Health Professionals on the Rights and Entitlements to Health care of Migrants (Repeated Session)  15.30-16.45
Facilitator  
**Anna Miller** (Doctors of the World)

Refugees and undocumented migrants are repeatedly reported to have multiple health needs yet research has shown that such individuals often receive less effective healthcare and face barriers when trying to access NHS care. This training module, aimed at healthcare professionals working in the NHS, is also relevant for those with an interest in health policy and human rights. The training covers entitlement to NHS care, barriers to accessing healthcare and the implications of restricting access to healthcare.

8D Interactive Humanitarian Simulation Experience (Part 2) 15.30-16.45 (with break)

Facilitator  
**Daniel Flecknoe** (Medecins Sans Frontieres)

Ever wondered what it would be like to provide humanitarian aid in a warzone? Could you keep vital services running while everything around you falls apart? This immersive and thought-provoking exercise will give you a rare insight into the practical challenges, ethical dilemmas and cultural barriers faced by humanitarian NGOs working in conflict zones. The exercise is set in Darfur in the mid-2000s and is based upon real events. **Delegates are advised that this session is part of a 3 hour session that begins at 2pm. There are 30 places in this session, so delegates are asked to reserve their space in advance.**

9D Religious Fundamentalism as a Threat to Peace and Health 15.30-16.45

Chairs  
**Dr. S. S. Soodan** (Indian Doctors for Peace and Development)  
**Dr. Satyajit Kumar Singh** (Indian Doctors for Peace and Development)  
Moderator  
**Dr Shakeel ur Rahman** (Indian Doctors for Peace and Development)  
Speaker  
**Ms. Amarjeet Kaur** (All India Trade Union Congress - AITUC)

Religion is a source of value systems in the world. Unfortunately, those at the helm of some religious groups have imposed dogmas that are violent and intolerant. Such tendencies have increased worldwide—from South Asia to the Middle East, to Europe, and to the Americas. Religious fundamentalism affects social harmony and, as a result, peace, economic and social development, education, and health. This also leads to the development of a culture of violence and jingoistic tendencies. There is a concerted need to debate the issue and to examine the role of medical professionals in containing such tendencies.

10D Tackling The Arms Trade 15.30-16.45

Facilitator  
**Robert Perkins** (Control Arms)

Every year hundreds of thousands of people are killed and millions more are injured, maimed, raped, or forced to flee from their homes as a result of the poorly regulated global arms trade. The uncontrolled proliferation of arms and ammunition fuels conflicts, increases human rights abuses and exacerbates poverty. Bringing the licit trade under control is the first necessary step toward addressing a reduction in the illicit trade. The Arms Trade Treaty and the UN Programme of Action on Small Arms and Light Weapons are two international agreements that can help reduce armed violence and protect human rights. This workshop will focus on how civil society and health professionals can and must contribute to the humanitarian implementation of these global commitments.

11D Pay it Forward: Engaging A new Generation of IPPNW Activists 15.30-16.45

Panel  
**Maria Valenti** (Director, Aiming for Prevention)  
**Hellen Barsosio** (Regional Vice President, Africa)  
**Sally Ndung’u** (IPPNW, Kenya)
Daniel Bassey (IPPNW, co-president)
Dr Alex Rosen (IPPNW, Germany)

Engaging medical students and young health professionals in meaningful IPPNW programs and actions is key to achieving the goals of IPPNW and its future success. A succession strategy is also critical to developing and maintaining strong affiliates. This workshop will focus on both affiliate capacity building and the development of a new federation-wide mentoring program that will bring together experienced IPPNW leaders and activists with the next generation of ‘peace through health’ advocates. We will invite ideas on how affiliates can recruit students to participate in governance and programs; activate mentees and mentors throughout the federation; foster leadership capabilities; develop skills related to IPPNW’s mission; and create an IPPNW orientation package for new/potential members.

12D Radiation Health Effects: Science and Beyond  15.30-16.45

Chair  Dr. Shunichi Kaseda (IPPNW and Hiroshima Red Cross Hospital and Atomic-Bomb Survivors Hospital)
Moderator  Professor Katsuko Kataoka (JPPNW)
Panelists  Ohtsura Niwa (Radiation Medical Science Center, Fukushima Medical University)
Professor Masao Tomonaga (IPPNW)
Professor Keith Baverstock Docent (Department of Environmental Science, University of Eastern Finland)
Dr. Ryoma Kayano (JPPNW)

Scientific understanding of the effects of radiation on human health has accumulated in the 70 years since the atomic bombings of Hiroshima and Nagasaki. But public perception of radiation effects is often based less on science than on awareness of the suffering of people from the atomic bombings, the Chernobyl disaster, and the events at Fukushima. This workshop will discuss the latest data on radiation and health and present varying perspectives on its significance. We should think back to the past when the atomic bombs were dropped in Hiroshima and Nagasaki in 1945 and understand the suffering of the survivors. The science of radiation health effects is their precious contribution to humankind.

17.00 - 18.00  Closing Plenary

Chair  TBC
Speakers  Ambassador Thomas Hajnoczi (Austria)
Dr Yoshitake Yokokura (World Medical Association)
David McCoy (Medact and Queen Mary University London)

18.30 - 21.30  Evening Programme

18.30-19.30  Thank You Drinks Reception

19.30 - 21.30  Evening Film Screening Lecture Theatre PX001
                We Are Many
Research Posters
